3. All-or-Nothing Multiple-Choice Questions
4. Short Answer Questions
5. Matching Questions
6. Select the missing word questions
7. Drag and Drop into Text
8. Calculated Simple Questions
9. True / False Questions
10. Essay Type Questions

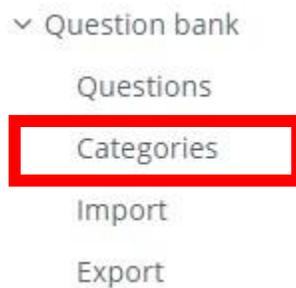

Introduction

This guide is mainly focused on different question types in Moodle. The primary purpose of preparing this guide is the requirement of auto-grade online examinations in the faculty of commerce & management studies, university of Kelaniya. This document provides all basic settings to prepare nine different types of questions with relevant examples.

Before creating questions in Moodle, it is extremely important to create relevant categories and subcategories in the Moodle question bank. The question bank is the repository that you store different questions of your course unit. By default, there is one category called “Default for [name of your course].” You can organize questions by creating additional categories and subcategories. Organizing questions into categories and subcategories will help you to design a good representative question paper in Moodle.

Adding categories in to the question bank - Steps

01. Click Categories from the “Question bank” drop-down in the “Course administration” menu.

02. Adding a category

▼ Add category

Parent category 

Name 

Category info

 Paragraph  **B**  *I*      

Path: p

ID number 

Add category

03. Adding a Sub-category

Subcategories should be created under the previously created parent category/ies.

▼ Add category

Parent category 

Name 

Category info

 Paragraph  **B**  *I*      

Path: p

ID number 

Add category

Adding questions to different categories in the question bank

Go to the question bank in the quiz administration, then select the relevant category and create questions.

Select the relevant category

Question bank

Select a category:

The default category for questions shared in context 'BACC 21352 Management Information Systems (18/19)'.

No tag filters applied

Question Types in Moodle

Question Type 01: Multiple Choice Questions

These questions allow one and only one answer to be chosen by providing radio buttons next to the answers. You can specify negative or non-negative marks for each answer, usually zero marks for wrong answers, maximum marks for correct answers and partial marks for partially correct answers

Example

The device that acts as a connection point between computers and can filter and forward data to a specified destination is called a(n) A) hub.

B) switch.

C) router.

D) NIC.

E) modem.

ANSWER: B

Note - Use the above question format for MCQ bulk uploads to the question bank in the Moodle.

Question 1
Not yet answered
Marked out of 1.00

The device that acts as a connection point between computers and can filter and forward data to a specified destination is called a(n)

Select one:

- a. router.
- b. NIC.
- c. switch.
- d. hub.
- e. modem.

Question 1
Correct
Mark 1.00 out of 1.00

The device that acts as a connection point between computers and can filter and forward data to a specified destination is called a(n)

Select one:

- a. NIC.
- b. modem.
- c. switch. ✓
- d. hub.
- e. router.

Question Type 02: All-or-Nothing Multiple Choice Questions

The all or nothing question is adapted from the existing multiple choice question. The main difference from the standard Moodle multiple choice question is in the way that grading works. The teacher editing interface is slightly modified as when creating the question, the teacher just indicates which choices are correct.

In an all-or-nothing multiple-choice question, a respondent can choose one or more answers. If the chosen answers correspond exactly to the correct choices defined in the question, the respondent gets 100%. If the student chooses any incorrect choices, or does not select all of the correct choices, the grade is 0%.

Example

What are the unique features of Internet and Web as commercial medium?

Ubiquity

Global reach

Universal standards

Richness

Convergence

Correct Answers

Question 1
Not yet answered
Marked out of 1.00

What are the unique features of Internet and Web as commercial medium.

Select one or more:

- a. Convergence
- b. Global reach
- c. Universal standards
- d. Richness
- e. Ubiquity

Question 1
Correct
Mark 2.00 out of 2.00

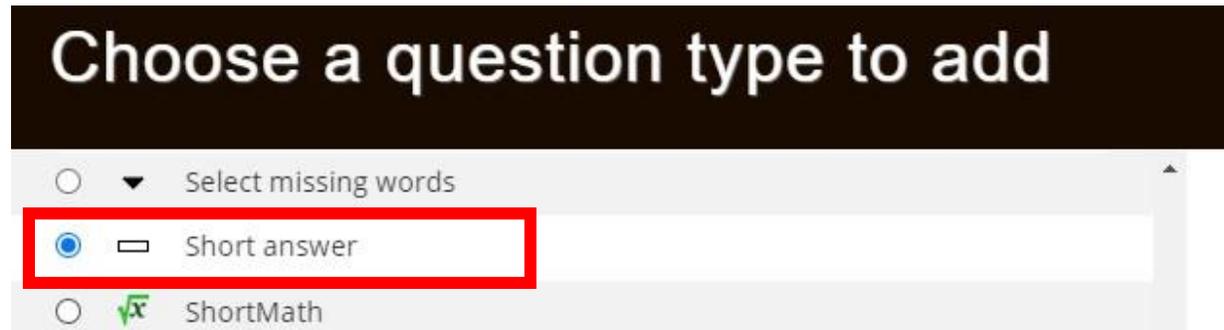

What are the unique features of Internet and Web as commercial medium.

Select one or more:

- a. Global reach ✓
- b. Richness ✓
- c. Ubiquity ✓
- d. Convergence
- e. Universal standards ✓

Question Type 03: Short Answer Questions

In a short answer question, the student types in a word or phrase in response to a question (that may include a image). Answers may or may not be case sensitive. The answer could be a word or a phrase, but it must match one of your acceptable answers exactly. It's a good idea to keep the required answer as short as possible to avoid missing a correct answer that's phrased differently.

Example

Which country has the largest economy?

United States	→	Expected Answer
US	}	Possible Answers
U.S.		
United States of America		
America

- Correct
- Mark 1.00 out of 1.00
- Question text: Which country has the largest economy?
- Answer field: Answer: ✓

Question Type 04: Matching Questions

Matching questions have a content area and a list of names or statements which must be correctly matched against another list of names or statements.

In the Quiz Module, each match is equally weighted to contribute towards the grade for the total question.

Example

Match the technology with the era of IT infrastructure evolution

Mainframe computers

Application Software

Integrated Software

Answers

General-purpose mainframe and minicomputer era

Personal computer era

Enterprise computing era

Distractors

Client/server era

It is possible to add extra answers as distractors to make the question more challenging.

Question Type 07: Calculated Simple Questions

Simple calculated questions offer a way to create individual numerical questions whose response is the result of a numerical formula which contain variable numerical values by the use of wildcards (i.e. {x} , {y}) that are substituted with random values when the quiz is taken.

Example

Saman earns Rs {dollars} per hour. He works {hours} hours. How much money did Saman earn?

Wild cards

{dollars}*{hours}

Saman earns Rs6.5 per hour. He works 1.6 hours. How much money did Saman earn?

Answer: ✓

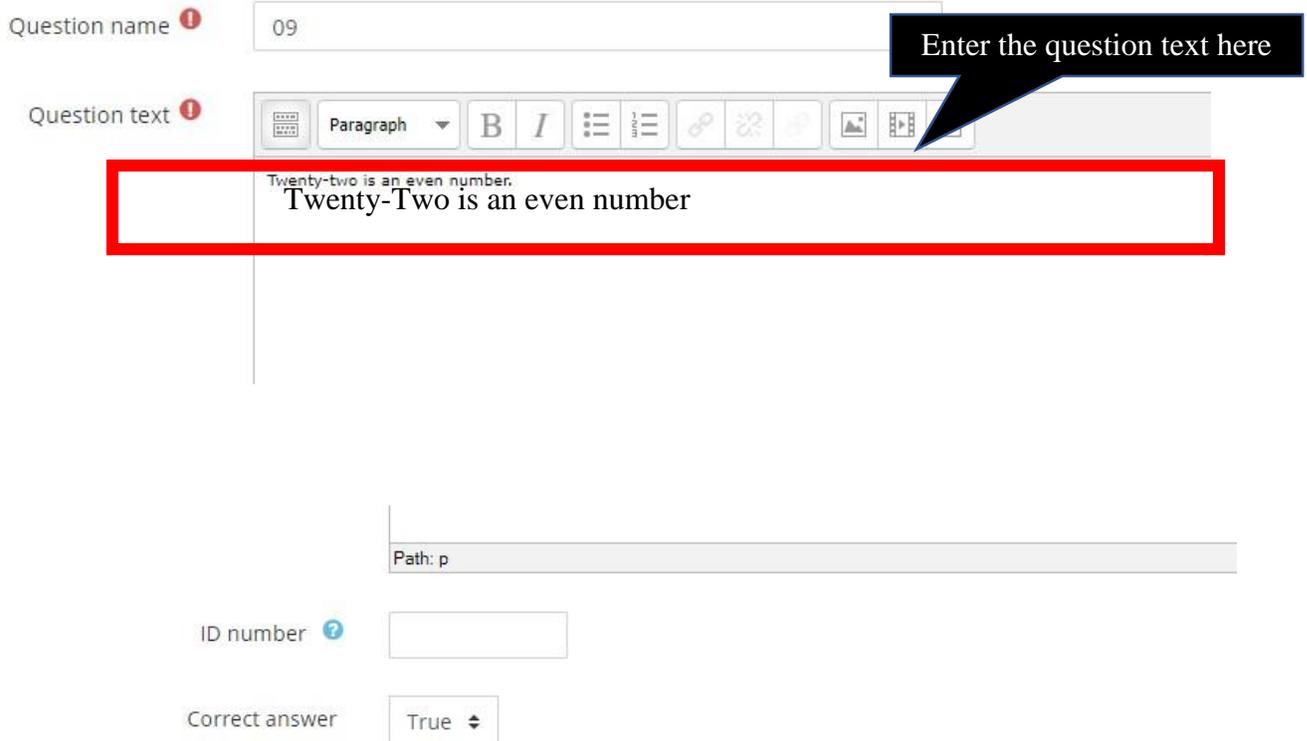

Question Type 08 : True / False Questions

A student is given only two choices for an answer in this kind of question: True or False. The question content can include an image or html code.

Example

Twenty-two is an even number.

Question Settings

The screenshot shows the Moodle question settings interface. The 'Question name' field contains '09'. The 'Question text' field contains 'Twenty-two is an even number.' and is highlighted with a red border. A black callout box with white text 'Enter the question text here' points to the text area. Below the text field is a rich text editor toolbar with options for Paragraph, Bold (B), Italic (I), Bulleted list, Numbered list, Link, Unlink, and Image. The 'Path' field is empty. The 'ID number' field is empty. The 'Correct answer' dropdown menu is set to 'True'.

Question Type 09: Essay Type Questions

The essay question type provides the option of answering by uploading one or more files and/or entering text online.

Essay questions are created in the same way as other quiz question types. The difference is that essay questions have to be marked manually, and the student will not get a final grade until the teacher has marked their essay.

Example

With the aid of relevant examples, evaluate the current impact and potential impact of using mobile handheld devices for business operations.
